Head in the Stars

- Special Eclipse -

Difficulty

The 8 planets of the solar system are jumbled up below.
Write the matching number in the space provided.
Then, test your knowledge with the True or False questions.

- 5

 Saturn
- 6

 Uranus
- 7

 Earth
- 8

 Venus
- 1

 Jupiter
- 2

 Mars
- 3

 Neptune
- 4

 Mercury

1.

 A year on Mercury lasts longer than a year on Earth.

A

 True

B

 False
2.

 Jupiter is heavier than all the other planets in the solar system combined.

A

 True

B

 False

MYSTERY WORD

SOLAR ECLIPSE

Spot the Mistakes

Solution

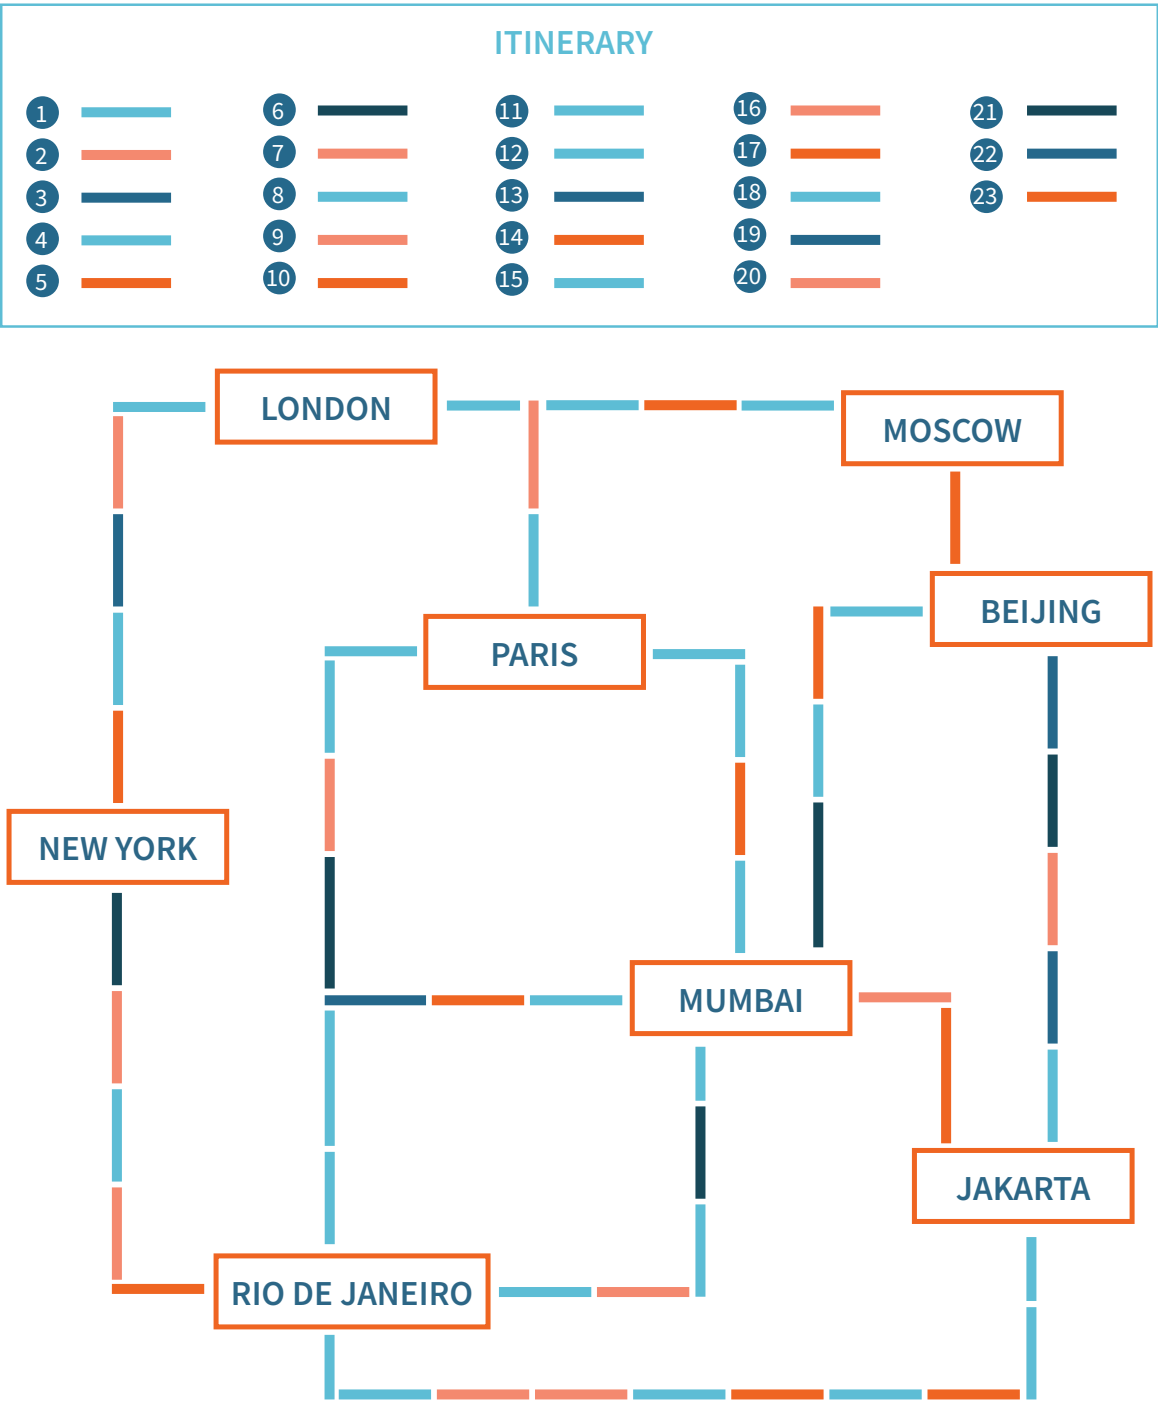

Follow the Route

Difficulty

Start in London and follow the colored routes of the itinerary shown below. Circle the arrival city!

Find the Items

- Special Beach -

Difficulty

★☆☆

Look closely at this scene. Can you find the 7 items below, hidden among the towels and beach umbrellas?

Fill in the Blanks

Solution

WORD LIST			
CAMERA	ALBUM	FRAME	CHEMICAL
SHOTS	DAGUERRE	FAMILY	WINTER
PICTURE	LAMP	MINUTES	DARK
ROLL FILM	FILM	DIM	19 TH

Photography was born in the early 19TH century, thanks to pioneers such as Nicéphore Niépce and Louis Daguerre.

At that time, one had to stay still for long minutes in front of the lens, under dim light!

Later, the invention of roll film made it possible to preserve precious family memories. Photos were developed in a dark room by the light of a red lamp, before being dipped in a chemical bath.

Each photo was then slipped into a frame or glued into the pages of an album that the family would flip through together on winter evenings.

Today, almost everyone carries a camera in their pocket thanks to smartphones. You can take hundreds of photos without ever running out of film, and share them instantly with your grandchildren.

But some enthusiasts still prefer analog photography, for the joy of developing their own shots and waiting for the magic of the picture.

Head in the Stars

Solution

- 5

Saturn
- 6

Uranus
- 7

Earth
- 8

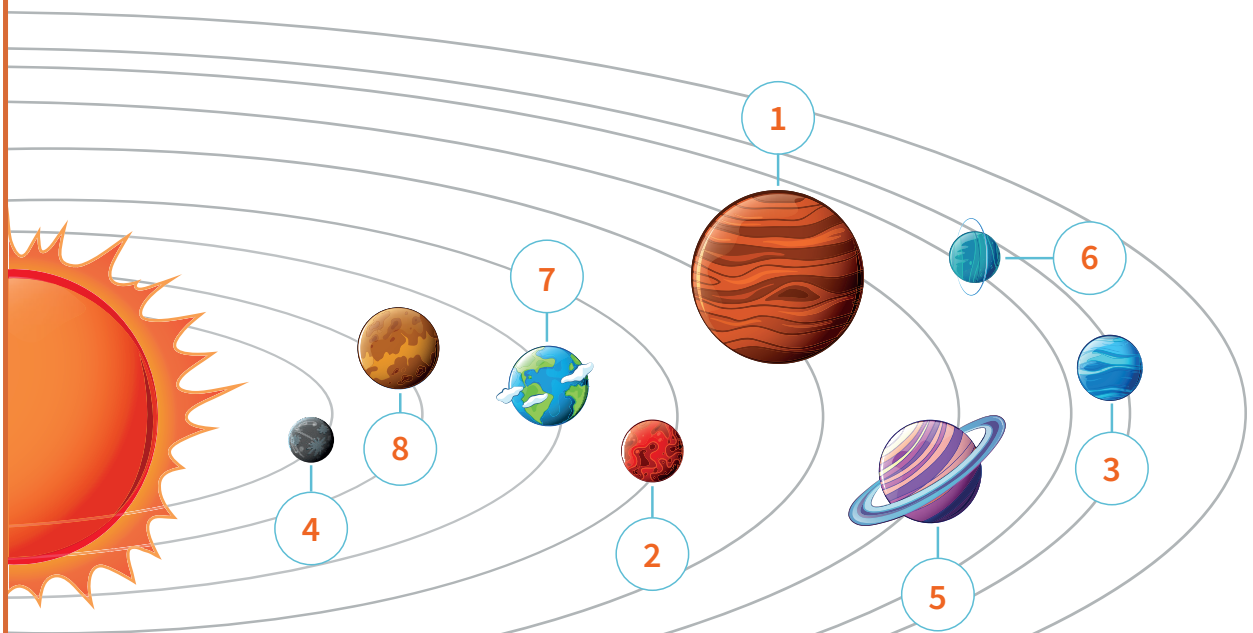

Venus
- 1

Jupiter
- 2

Mars
- 3

Neptune
- 4

Mercury

1.

A year on Mercury lasts longer than a year on Earth.

B

False

Mercury, the planet closest to the Sun, completes its orbit in just 88 days, compared to 365 days for Earth. It's actually the opposite: its year is much shorter.
2.

Jupiter is heavier than all the other planets in the solar system combined.

A

True

With a mass equivalent to about 318 times that of Earth, Jupiter alone weighs more than twice the combined mass of all the other planets in the solar system.

Boggle

Difficulty

Form as many words as possible by connecting neighboring letters (left, right, up, down, diagonals). A letter can only be used once per word. Only words of 3 letters or more count.
